Town Clerk

June Highway Report

June 9 2026

- Two large logging projects under way in Town. TONTARSKI and PARISH ROADS.
- All roads have had their first grading.
- 3rd round of dust control completed and watering trailer set up to keep calcium chloride activated when mother nature can't. Water pump loading station set up on Hubbard Rd beaver flow culvert.
    - What's our strategy for dust control? Residential, camps, camp grounds, rentals?
- State budget passed and all Chips funding programs activated. First submission due this Fri. We will meet that deadline for payment July 15th. Submissions will total approximately 3/4s of total of the four funds with remaining submission in September.
- New building going on in the town with driveway culvert permits requested.
- County chip sealing this week in town.
- McDonald Rd rehabilitation pricing. Discussion needed on what direction to go.
- Helped Croghan under the Shared Services to black top.
- Equipment Auction as of this time Sunday there is nothing at a level to release. Poor results.
- Pot holes continued to be addressed weekly.
- One more dry hydrant to install on farm pond by Pinckney Rd Cemetery.
- Modification to Cronk Rd hydrant for additional bumper room will be completed this week. It's my understanding most were test pumped recently.
- Resurfaced bad portions of McGowan Rd.

*** DEC news. Group that failed to complete our permit application for the Denning West bridge replacement are no longer in Watertown group.

New leader reached out to work with us. Meeting with the new group this Thursday. Lowville Forestry DEC has marked the trees and Army Corps of Engineers are on board.

Will communicate results.

Respectfully submitted by:

Don Cook
